March 26, 1958

Gentlemen:

The thought of organizing an Amateur Radio Council of all established clubs in the metropolitan Milwaukee area was brought about by three or four factors. This is not the first time that such a council existed in this area. At the present time, all hams have been put under pressure in order to maintain our present status of frequencies to do things that have never been required of us before, such as tracking of a foreign satellite.

The next factor which is very important is to attempt to maintain frequencies by the proper association which have lobbies in Washington. Therefore, I list here four items to be considered in our first meeting. They are not in line with their importance, only as I have thought of them.

1. To promote every amateur to join and be active in the club of his choice. It may be advisable to promote a couple of more clubs or groups with special interests or local.
2. To be unified in our efforts toward emergency and civilian defense as well as communications of a civilian nature.
3. To work together to bring under control the FVI situation. Congressman Jablonski has had too many complaints from persons in this area from FVI. As a result, he is not apt to be sympathetic toward the ham. We must clear this situation immediately.
4. The attempt to get more ARRL members to support our claim that the ARRL lobby is representing the majority of the hams.

CONTINUATION OF LETTER TO

The Milwaukee Radio Amateurs' Club has been active in seeking the TVI complaints. We need the help of each club to discuss TVIs in their respective groups and how to eliminate it or handle the situation.

For the foregoing purposes, I am asking for a meeting of those interested parties who have been selected from their clubs to represent them to meet in my office on Monday, April 7th, 1958 at 7:30 P.M. The address is : 744 North 4th Street, Room 519. This meeting will not be closed to anyone, but for the purposes of organization only those who were chosen shall start the organization. If there are any organized clubs in the city or surrounding area who are not listed below, would you take it upon yourself to contact them personally asking for representation at this meeting.

Very truly yours,

R. H. Oberholtzer, President
Milwaukee Radio Amateurs' Club
